Royal
Enterprises

About Us!

Royal Enterprises has been a trusted name with lots of experience more than 4 Decades in the printing industry, As a leading supplier of machine parts since 1985, Our mission is to deliver top-quality materials at competitive prices, backed by exceptional customer service. We offer an extensive range of over 6500 parts and materials.

We are manufacturer of Coating Roller & Hard Chrome Roller by fully automatic machines with top quality (Rilsan) raw materials. Well known expertise in Heidelberg, Komori, KBA spare parts - Polar, Seypa cutting machine & Stahl Folding machine spare parts & accessories.

We deliver all over the world.

As the printing industry evolves, we continually update our inventory with the latest spare parts.

Visit our website at www.royaloffsetparts.com to explore our comprehensive catalogue and discover more about our products. -

Unbeatable quality and reliability -

Competitive pricing - World-class

customer service - Extensive product

range - Continuous updates with the

latest printing parts Contact us today to

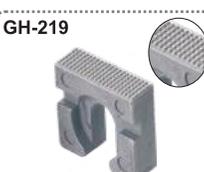

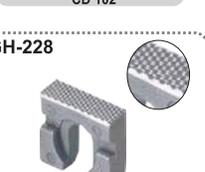

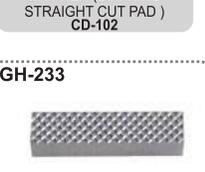

experience the **Royal Enterprises** difference!

Rilsan Coating and Hard Chrome Rollers

Rilsan Rollers

Rilsan is a high-performance polyamide polymer powder that is thermally fused to external surfaces to produce a tough protective layer. A Rilsan coating resists both physical wear and tear and chemical impacts like corrosion. It is commonly used to extend the life and durability in various industrial equipment and their applications. Rilsan coating is also referred to as nylon or plastic coating. It is used by various printing machine manufacturers such as Heidelberg, Roland, Goss, and Komori.

Rilsan Rollers

- High resistance to hydrocarbon and various chemicals.
- Easy to clean and maintain.
- Anti-corrosion properties.
- Exceptional resistance to wear and tear and heat.
- Smooth surface finish and low friction.
- High resistance to damage from inks and solvents.
- Machining suitability and dimensional stability.

Benefits of Rilsan Coating

- Considerable savings and mileage can be achieved in steel knurled rollers,
- Chrome rollers in Rilsan against new replacement.
- Durability and longer life
- Cost savings
- Improve print quality
- Able to run the press at higher speed
- electrical insulation
- Resistance to scratching, corrosion, abrasion
- A smooth finish which helps repel dirt and ensure easy cleaning
- Resistance to inorganic salts, alkalis.
- Fountain and wash friendly.
